#### **Notes to Schedule of Investments**

#### Note 1 - Organization

Amana Mutual Funds Trust (the "Trust") was organized as a Delaware Statutory Trust on March 11, 2013, and is the successor to Amana Mutual Funds Trust, an Indiana Business Trust organized on July 26, 1984, pursuant to a reorganization on July 19, 2013.

### **Note 2 - Significant Accounting Policies**

### **Security valuation:**

Investments in securities traded on a national securities exchange and overthe-counter securities for which sale prices are available are valued at that price. Securities for which there are no sales are valued at latest bid price.

Foreign markets may close before the time as of which the Funds' share prices are determined. Because of this, events occurring after the close and before the determination of the Funds' share prices may have a material effect on the values of some or all of the Funds' foreign securities. To account for this, the Funds may use outside pricing services for valuation of their non-US securities.

In cases in which there is not a readily available market price, a fair value for such security is determined in good faith by the Adviser, whom the Board of Trustees has designated as the Funds' valuation designee to perform fair value determinations relating to all Fund investments.

Security transactions are recorded on trade date. Realized gains and losses on sales of securities are recorded on the identified cost basis.

Sukuk certificates in which the Participation Fund invests are valued based on evaluated prices supplied by an independent pricing service, which include valuations provided by market makers and other participants, provided that there is sufficient market activit on which the pricing service can base such valuations. Where market activity is insufficient for making such determinations, the independent pricing service uses proprietary valuation methodologies and may consider a variety of factors, such as yield curves, credit spreads, estimated default rates, anticipated market interest rate volatility, coupon rates, and other factors in order to calculate the security's fair value.

Bank time deposits are accounted for on cost basis, which approximates market value. Bank time deposits will be categorized as Fair Value Level 2.

#### **Fair Value Measurements Disclosure:**

Accounting Standards Codification (ASC) 820 establishes a three-tier framework for measuring fair value based on a hierarchy of inputs. The hierarchy distinguishes between market data obtained from independent sources (observable inputs) and the Funds' own market assumptions (unobservable inputs). These inputs are used in determining the value of the Funds' investments and are summarized below.

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities that the Trust has the ability to access.
- Level 2 Observable inputs other than quoted prices in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.
- Level 3 Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Trust's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of August 31, 2024, in valuing the Funds' investments carried at value:

	Level 1	Level 2	Level 3	Total
Common Stock				
Communications	\$219,746,100	\$-	\$-	\$219,746,100
Consumer Discretionary	\$361,519,700	\$-	\$-	\$361,519,700
Consumer Staples	\$229,117,644	\$-	\$-	\$229,117,644
Health Care	\$1,246,916,956	\$-	\$-	\$1,246,916,956
Industrials	\$648,819,976	\$102,178,966	\$-	\$750,998,942
Technology	\$2,607,078,499	\$-	\$-	\$2,607,078,499
Total Common Stock	\$5,313,198,875	\$102,178,966	\$-	\$5,415,377,841
Total Assets	\$5,313,198,875	\$102,178,966	\$-	\$5,415,377,841
