Saturna Growth Fund

Investment Objective

Long-term capital growth.

Fees and Expenses

This section describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Growth Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Shareowner Fees

None.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Growth Fund	Investor Shares	Z Shares
Management Fees	0.50%	0.50%
Distribution (12b-1) Fees	0.25%	None
Other Expenses	0.21%	0.22%
Total Annual Fund Operating Expenses	0.96%	0.72%

Example

This Example is intended to help investors compare the cost of investing in shares of the Fund with the cost of investing in other mutual funds.

The Example assumes an investor invests \$10,000 in shares of the Fund for the time periods indicated and then redeems all shares at the end of those periods. The Example also assumes that the investment has a 5% return each year and that the Fund's operating expenses remain the same. Although actual costs may be higher or lower, based on these assumptions, an investor's expenses would be:

	1 Year	3 Years	5 Years	10 Years
Investor Shares	\$98	\$306	\$531	\$1,178
Z Shares	\$74	\$230	\$401	\$894

Portfolio Turnover

The Fund may have transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 5.71% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks long-term capital growth by investing in common stocks of US companies. The Fund diversifies its investments across industries and companies. The Fund looks for companies with growing revenues and earnings, favoring companies trading for less than the investment adviser's assessment of intrinsic value, which typically means companies with low price/earning multiples, low price to cash flow, and higher dividend yields. The Fund principally invests in securities of companies with market capitalizations greater than \$1 billion.

Principal Risks of Investing

Market risk: The value of the Fund's shares rises and falls as the market value of the securities in which the Fund invests goes up and down. Consider investing in the Fund only if you are willing to accept the risk that you may lose money. Fund share prices, yields, and total returns will change with the fluctuations in the securities markets as well as the fortunes of the industries and companies in which the Fund invests.

Equity securities risk: Equity securities may experience significant volatility in response to economic or market conditions or adverse events that affect a particular industry, sector, or company. Larger companies may have slower rates of growth as compared to smaller, faster-growing companies. Smaller companies may have more limited financial resources, products, or services, and tend to be more sensitive to changing economic or market conditions.

Liquidity risk: Liquidity risk exists when particular investments are difficult to sell and may be more difficult to value. If the Fund is forced to sell these investments during unfavorable conditions to meet redemptions or for other cash needs, the Fund may lose money on its investments. As a result, the Fund may be unable to achieve its objective.

Sector risk: From time to time, based on market or economic conditions, the Fund may have significant positions in one or more sectors of the market. To the extent the Fund invests more heavily in particular sectors, its performance will be especially sensitive to developments that significantly affect those sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. The industries that constitute a sector may all react in the same way to economic, political, or regulatory events which may cause the Fund's returns to suffer.

Performance

Annual Total Return

The following bar chart presents the calendar year total returns of the Fund's Investor Shares before taxes. The bar chart provides an indication of the risks of investing in the Fund by showing changes in performance from year to year. A fund's past performance (before and after taxes) is not a guarantee of how a fund will perform in the future.

Performance data current to the most recent month-end and quarter-end are available on www.saturna.com/resources/literature.

Best Quarter	Q2 2020	25.45%
Worst Quarter	Q2 2022	-17.73%

Average Annual Total Returns

¹ Saturna Growth Fund Investor Shares began operations April 1, 1987.

² Saturna Growth Fund Z Shares began operations June 2, 2017, and the Life of Fund return for the S&P 500 index, Bloomberg US Large Cap Total Return Index, and Bloomberg 1000 Growth Total Return Index is shown since this date.

³ The Fund changed its benchmarks to simplify Fund performance benchmarking and marketing, and to reduce data expenses related to Fund benchmarks.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of any state or local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

In loss periods, the average after-tax total return may be higher than the average annual total return because of an assumed deduction of losses from other income.

Tax Information

Any distributions you receive from the Fund may be taxed as ordinary income, qualified dividend income, or capital gains.

Financial Intermediary Compensation

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
