For the 15-year period ended May 31, 2026, the Investor Shares provided an annualized return of 14.45%. Since the Fund's inception on February 3, 1994, the Investor Shares provided an annualized return of 12.40%.

What Factors Influenced Performance?

Stock selection was strong, especially in the Industrial, Information Technology, and Communications sectors. While the artificial intelligence trade remained dominant, it broadened to include adjacent companies, which benefited several of our holdings.

Looking Forward

Middle East conflict and increased oil prices have spurred higher inflation. Core inflation has not been as affected but remains above the Federal Reserve's 2% target. High inflation, the potential for higher interest rates and stretched market valuations create uncertainty.
