SUMMARY PROSPECTUS

*Before you invest, you may want to review Sextant International Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's **prospectus** and other information about the Fund, including the **statement of additional information** and most recent reports to shareowners, online at www.saturna.com/prospectus. You can also get this information at no cost by calling 1-800-728-8762 or by sending an email request to info@saturna.com. The Fund's prospectus and statement of additional information, both dated March 31, 2023, are incorporated by reference into this Summary Prospectus.*

Investment Objective

Long-term capital growth.

Fees and Expenses

This section describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

Shareowner Fees

None.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor Shares	Z Shares
Management Fees ¹	0.50%	0.50%
Distribution (12b-1) Fees	0.25%	None
Other Expenses	0.29%	0.30%
Total Annual Fund Operating Expenses	1.04%	0.80%

¹ Effective March 31, 2023, the management fee paid to Saturna Capital Corporation, the Fund's adviser, for providing services to the Fund is 0.50% of average daily net assets of the Fund. Prior to this date, the management fee consisted of a base fee at an annual rate of 0.50% of the Fund's average net assets and a positive or negative performance adjustment of up to an annual rate of 0.20% (applied to the average assets at the end of each month), resulting in a total minimum fee of 0.30% and a total maximum fee of 0.70%. The average monthly management fee for the year ended November 30, 2022, was 0.74% (annual rate).

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 year	3 years	5 years	10 years
Investor Shares	\$106	\$331	\$574	\$1,271
Z Shares	\$82	\$255	\$444	\$990

Portfolio Turnover

The Fund may have transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance.

During the most recent fiscal year, the Fund's portfolio turnover rate was 33.00% of the average value of its portfolio.

Principal Investment Strategies

The Fund diversifies its investments among many countries, predominantly those with mature markets (such as Europe and Canada). The Fund may also invest in companies in emerging markets. The Fund invests at least 65% of its net assets in equity securities of companies with their headquarters, and at least half of their assets and earnings, outside the US. The Fund diversifies its investments across industries, companies, and countries. The Fund looks for companies with growing revenues and earnings, favoring companies trading for less than the adviser's assessment of intrinsic value, which typically means companies with low price/earning multiples, low price to cash flow, and higher dividend yields. The Fund principally invests in securities of companies with market capitalizations greater than \$1 billion.

Principal Risks of Investing

Market risk: The value of the Fund's shares rises and falls as the market value of the securities in which the Fund invests goes up and down. Consider investing in the Fund only if you are willing to accept the risk that you may lose money. Fund share prices, yields, and total returns will change with the fluctuations in the securities markets as well as the fortunes of the industries and companies in which the Fund invests.

Equity securities risk: Equity securities may experience significant volatility in response to economic or market conditions or adverse events that affect a particular industry, sector, or company. Larger companies may have slower rates of growth as compared to smaller, faster-growing companies, and at times may be out of favor with investors. Smaller companies may have more limited financial resources, products, or services, and tend to be more sensitive to changing economic or market conditions.

Foreign investing risk: The Fund may invest in securities that are not traded in the United States when market conditions or investment opportunities arise that, in the judgment of the adviser, warrant such investment. Investments in the securities of foreign issuers may involve risks in addition to those normally associated with investments in the securities of US issuers. All foreign investments are subject to risks of: (1) foreign political and economic instability; (2) adverse movements in foreign exchange rates; (3) currency devaluation; (4) the imposition or tightening of exchange controls or other limitations on repatriation of foreign capital; (5) changes in foreign governmental attitudes towards private investment, including potential nationalization, increased taxation, or confiscation of assets; and (6) differing reporting, accounting, and auditing standards of foreign countries.

Emerging markets risk: There are heightened risks when investing in emerging markets, which are generally less liquid and more volatile than more developed securities markets. These risks include greater political or economic uncertainties; delays and disruptions in securities settlement procedures; weaker corporate governance, accounting, auditing and financial reporting standards; and less publicly available information about issuers. Emerging market countries' governments may also be more likely to impose capital controls or nationalize an industry.

Liquidity risk: Liquidity risk exists when particular investments are difficult to sell and may be more difficult to value. If the Fund is forced to sell these investments during unfavorable conditions to meet redemptions or for other cash needs, the Fund may lose money on its investments. As a result, the Fund may be unable to achieve its objective.

Sector risk: From time to time, based on market or economic conditions, the Fund may have significant positions in one or more sectors of the market. To the extent the Fund invests more heavily in particular sectors, its performance will be especially sensitive to developments that significantly affect those sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. The industries that constitute a sector may all react in the same way to economic, political or regulatory events.

Large transaction risk: A significant percentage of the Fund's shares may be owned or controlled by the adviser and its affiliates or other large shareholders. Accordingly, the Fund is subject to the potential for large-scale inflows and outflows as a result of purchases and redemptions of its shares by such shareholders. These inflows and outflows could negatively affect the Fund's net asset value and performance.

Performance

Annual Total Return

The following bar chart presents the calendar year total returns of the Fund's Investor Shares before taxes. The bar chart provides an indication of the risks of investing in the Fund by showing changes in performance from year to year. A fund's past performance (before and after taxes) is not a guarantee of how a fund will perform in the future.

Performance data current to the most recent month-end and quarter-end are available at www.sextantfunds.com.

Best Quarter	Q2 2020	18.46%
Worst Quarter	Q1 2020	-20.85%

Average Annual Total Returns

The table below presents the average annual returns for the Fund and provides an indication of the risks of investing in the Fund by showing how the Fund's average annual returns for 1, 5, and 10 years and for the Life of the Fund compare to those of a broad-based market index.

^A Sextant International Fund Investor Shares began operations September 28, 1995.

^B Sextant International Fund Z Shares began operations June 2, 2017, and the Life of Fund return for the MSCI EAFE Index is shown since this date.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of any state or local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their

Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

In loss periods, the average after-tax total return may be higher than the average annual total return because of an assumed deduction of losses from other income.

Investment Adviser

Saturna Capital Corporation is the Fund's investment adviser.

Portfolio Managers

Mr. Christopher W. Lang CFA®, portfolio manager and senior investment analyst of Saturna Capital Corporation, is the person primarily responsible for the day-to-day management of the Fund, which he has managed since 2023. From March 2020 to March 2023, Mr. Lang was deputy portfolio manager of the Fund. Mr. Bryce R. Fegley MS, CIPM®, CFA®, a portfolio manager and investment analyst of Saturna Capital Corporation, has been the deputy portfolio manager since 2023.

Tax Information

Any distributions you receive from the Fund may be taxed as ordinary income, qualified dividend income, or capital gains.

Financial Intermediary Compensation

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
